

## DevOps Engineer (m/w/d)

Job ID: 250213

Freiburg, Deutschland

### About us

AppTec is a leading software vendor in the field of Unified Endpoint Management and Mobile Security. AppTec is a rapidly growing, self-funded, profitable and globally distributed company. More than 6,400 companies and organizations in 107 countries worldwide utilize the APPTEC360 EMM platform to meet the challenges that they face, when managing applications, documents, configurations and security on mobile devices and desktops.

### Profil

**Location:** Freiburg im Br.

**Start:** immediately or by arrangement

**Department:** Technical Support

**Pensum:** 100%

### Your tasks

- Infrastructure automation
  - Development of infrastructure-as-code with Terraform for cloud/on-premise resources
  - Operation and further development of Ansible playbooks for server configurations
  - Management of our VMware virtualisation environment (ESXi/vCenter)
- Server operation
  - Administration of Debian servers for internal tools and customer systems
  - Security updates, backup management and troubleshooting
  - Support for PHP, Node.js and Ruby applications

### Your Qualifications

- Completed technical studies (e.g. computer science, business informatics)
- Practical experience with Debian/Linux administration
- Confident handling of Ansible and Terraform in productive use.
- Basic understanding of virtualisation technologies
- Basic knowledge of network administration (e.g. firewalls, VPN, SSL certificates, DNS etc.)
- Experience with scripting (Bash/Python) and Git-versioning
- Sound knowledge in the administration of MySQL/MariaDB databases

## Desirable

- Experience with container orchestration (Docker/Kubernetes) for future projects
- Basic knowledge of network administration (e.g. firewall, VPN)
- Certifications in relevant areas are an advantage, but not a prerequisite
- Basic knowledge of monitoring tools such as Icinga/Prometheus/Grafana or ELK stack desired
- Experience with containerisation of services with Docker and Kubernetes
- Experience with CI/CD processes with GitLab CI
- Experience with PostgreSQL databases
